TF TECBOND HOTMELT GLUE 43MM

Hotmelt glue. Sold in packs of 10kg.

Art.no	8811361
GTIN	7071236011712

TF hot melt glue is a product consisting of 100% thermoplastic polymer. It contains neither water nor solvents, and is quickly melted with heat, allowing the glue to be applied in liquid form. TF hot melt glue is adapted to temperatures between 120℃ and 215℃.

Hot melt glue is applied to the object you want to glue in a liquid/molten state. As soon as the parts to be glued are pressed together, the hot melt glue spreads outwards and into these parts. The glue then forms and cools down quickly, binding the parts together almost immediately.

Most materials can be glued together with hot melt glue, but only if the parts can be joined while the glue is still liquid. The opening time, ie. the time the glue stays liquid, varies from a few seconds to several minutes.
